Biotechnology & Bioengineering

Volume 52, 1996

October 5, 1996

Special Issue:
Biochemical Engineering IX–Interdisciplinary Foundations for Creating New Biotechnology: I

Edited by:
Dane W. Zabriskie and K. Dane Wittrup

1 Preface
D.W. Zabriskie and K.D. Wittrup

Biomedical Technology

3 Biological and Physical Factors Influencing the Successful Engraftment of a Cultured Human Skin Substitute
N. Parenteau, M. Sabolinski, S. Prosky, C. Nolte, M. Oleson, K. Kriwet, and P. Bilbo

15 Enhanced Function of Cultured Epithelium by Genetic Modification: Cell-Based Synthesis and Delivery of Growth Factors
S.A Eming, M.L. Yarmush, and J.R. Morgan

24 Unilineage Model of Hematopoiesis Predicts Self-Renewal of Stem and Progenitor Cells Based on Ex Vivo Growth Data
C.-A. Peng, M.R. Koller, and B.Ø. Palsson

34 Hollow Fiber Bioartificial Liver Utilizing Collagen-Entrapped Porcine Hepatocyte Spheroids
F.J. Wu, J.R. Friend, A. Lazar, H.J. Mann, R.P. Remmel, F.B. Cerra, and W.-S. Hu

45 A Self-Regulating Cell Culture Analog Device to Mimic Animal and Human Toxicological Responses
M.L. Shuler, A. Ghanem, D. Quick, M.C. Wong, and P. Miller

61 Engineering Dynamics of Growth Factors and Other Therapeutic Ligands
D.A. Lauffenburger, L. Chu, A. French, G. Oehrtman, C. Reddy, A. Wells, S. Niyogi, and H.S. Wiley

81 Platelet Adhesion to Polyurethane Blended with Polytetramethylene Oxide
C.B. Herbert, A.M. Hernandez, and J.A. Hubbell

89 Poly(organo phosphazene) Nanoparticles Surface Modified with Poly(ethylene oxide)
J. Vandorpe, E. Schacht, S. Stolnik, M.C.Garnett, M.C. Davies, L. Illum, and S.S. Davis

96 Poly(fumaric-*co*-sebacic) Microspheres as Oral Drug Delivery Systems
D. Chickering, J. Jacob, and E. Mathiowitz

102 Biomedical Applications of Degradable Polyphosphazenes
E. Schacht, J. Vandorpe, S. Dejardin, Y. Lemmouchi, and L. Seymour

Metabolic Engineering and Cell Physiology

109 Inverse Metabolic Engineering: A Strategy for Directed Genetic Engineering of Useful Phenotypes
J.E. Bailey, A. Sburlati, V. Hatzimanikatis, K. Lee, W.A. Renner, and P.S. Tsai

122 Evolutionally Guided Enzyme Design
C. Khosla, R. Caren, C.M. Kao, R. McDaniel, and S.-W. Wang

129 Pathway Analysis, Engineering, and Physiological Considerations for Redirecting Central Metabolism
J.C. Liao, S.-Y. Hou, and Y.-P. Chao

141 Cybernetic Modeling of Growth in Mixed, Substitutable Substrate Environments: Preferential and Simultaneous Utilization
R. Ramakrishna, D. Ramkrishna, and A.E. Konopka

152 Effects of Elevated pCO_2 and/or Osmolality on the Growth and Recombinant tPA Production of CHO Cells
R. Kimura and W.M. Miller

161 Role of Glucose Signaling in Yeast Metabolism
K. van Dam

166 Enhancement of Survivability of Mammalian Cells by Overexpression of the Apoptosis-Suppressor Gene *bcl-2*
R.P. Singh, A.N. Emery, and M. Al-Rubeai

176 Uncoupling Effect of Nitrite During Denitrification by *Pseudomonas fluorescens*: An In Vivo ^{31}P-NMR Study
W.F.H. Sijbesma, J.S. Almeida, M.A.M. Reis, and H. Santos

October 20, 1996

Special Issue
Biochemical Engineering IX—Interdisciplinary Foundations for Creating New Biotechnology: II

Edited by:
Dane W. Zabriskie and K. Dane Wittrup

183 Preface
D.W. Zabriskie and K.D. Wittrup

Bioprocess Technologies

185 Novel Bioseparations Using Two-Phase Aqueous Micellar Systems
C.-L. Liu, Y.J. Nikas, and D. Blankschtein

193 Self-Interaction Chromatography: A Tool for the Study of Protein–Protein Interactions in Bioprocessing Environments
S.Y. Patro and T.M. Przybycien

204 Optimization of Affinity and Ion-Exchange Chromatographic Processes for the Purification of Proteins
Q.M. Mao and M.T.W. Hearn

223 Fundamental Questions in Optimizing Ion-Exchange Chromatography of Proteins Using Computer-Aided Process Design
A. Jungbauer and O. Kaltenbrunner

237 Semi-on-Line Analysis for Fast and Precise Monitoring of Bioreaction Processes
L.H. Christensen, J. Marcher, U. Schulze, M. Carlsen, R.W. Min, J. Nielsen, and J. Villadsen

248 Fluid Dynamics in Bubble Column Bioreactors: Experiments and Numerical Simulations
A. Lübbert, T. Paaschen, and A. Lapin

259 Capillary Electrophoresis of DNA in Uncrosslinked Polymer Solutions: Evidence for a New Mechanism of DNA Separation
A.E. Barron, W.M. Sunada, and H.W. Blanch

271 Monitoring and Control of the Physiological State of Cell Cultures
K.B. Konstantinov

Biocatalysis

290 Chemical Versus Biochemical Conversion: When and How to Use Biocatalysts
J. Tramper

296 Extraordinary Enantiospecificity of Lipase Catalysis in Organic Media Induced by Purification and Catalyst Engineering
S.-W. Tsai and J.S. Dordick

301 Biosynthesis of Synthons in Two-Liquid-Phase Media
M.G. Wubbolts, O. Favre-Bulle, and B. Witholt

309 Enzyme Engineering Aspects of Biocatalysis: Cofactor Regeneration as Example
U. Kragl, W. Kruse, W. Hummel, and C. Wandrey

320 Application of High Hydrostatic Pressure for Increasing Activity and Stability of Enzymes
V.V. Mozhaev, R. Lange, E.V. Kudryashova, and C. Balny

332 Characterization of Extremely Thermostable Enzymatic Breakers (α-1,6-Galactosidase and β-1,4-Mannanase) from the Hyperthermophilic Bacterium *Thermotoga neapolitana* 5068 for Hydrolysis of Guar Gum
C.M. McCutchen, G.D. Duffaud, P. Leduc, A.R.H. Petersen, A. Tayal, S.A. Khan, and R.M. Kelly

340 The Use of Confocal Scanning Laser Microscopy and Other Tools to Characterize *Escherichia coli* in a High-Cell-Density Synthetic Biofilm
K.L. Swope and M.C. Flickinger

November 5, 1996

357 Kinetics of Chromate Reduction During Naphthalene Degradation in a Mixed Culture
H. Shen, P.H. Pritchard, and G.W. Sewell

364 On-Line Monitoring of Intracellular ATP Concentration in *Escherichia coli* Fermentations
D.R Lasko and D.I.C. Wang

373 Prediction of Optimal Biofilm Thickness for Membrane-Attached Biofilms Growing in an Extractive Membrane Bioreactor
P. Pavasant, L.M. Freitas dos Santos, E.N. Pistikopoulos, and A.G. Livingston

387 Continuous Enzymatic Production of Xylitol with Simultaneous Coenzyme Regeneration in a Charged Membrane Reactor
B. Nidetzky, W. Neuhauser, D. Haltrich, and K.D. Kulbe

397 Cell Harvesting by Cross-Flow Microfiltration Using a Shear-Enhanced Module
U. Frenander and A.-S. Jönsson

404 Perturbation of Syntrophic Isobutyrate and Butyrate Degradation with Formate and Hydrogen
W.-M. Wu, M.K. Jain, R.F. Hickey, and J.G. Zeikus

412 Growth and Respiration of *Petunia hybrida* Cells in Chemostat Cultures: A Comparison of Glucose-Limited and Nitrate-Limited Cultures
L.P.E. de Gucht and L.H.W. van der Plas

Communications to the Editor

423 Enzymatic Catalysis in Organic Solvents: Polyethylene Glycol Modified Hydrogenase Retains Sulfydrogenase Activity in Toluene
C.A. Woodward and E.N. Kaufman

429 Two-Dimensional Versus Three-Dimensional Culture Systems: Effects on Growth and Productivity of BHK Cells
P.M. Alves, J.L. Moreira, J.M. Rodrigues, J.G. Aunins, and M.J.T. Carrondo

433 New Constraints Between Kinetic Parameters Explain the (Un)identifiability of Enzymatic Rate Constants
A.J.J. Straathof and J.J. Heijnen

438 Imaging the Propagation of Viruses
Y. Lee and J. Yin

443 On-Line Measurement of Oxygen Uptake in Cell Culture Using the Dynamic Method
V. Singh

November 20, 1996

449 Crystallization of Biological Macromolecules from Flash Frozen Samples on the Russian Space Station Mir
S. Koszelak, C. Leja, and A. McPherson

459 Stereoselective Bioconversions in Continuously Operated Fixed Bed Reactors: Modeling and Process Optimization
M. Indlekofer, F. Brotz, A. Bauer, and M. Reuss

472 Permeability of Alginate Microcapsules to Secretory Recombinant Gene Products
D.E. Awrey, M. Tse, G. Hortelano, and P.L. Chang

485 Optimization of Regulatory Architectures in Metabolic Reaction Networks
V. Hatzimanikatis, C.A. Floudas, and J.E. Bailey

501 Separation of Hemoglobin and Myoglobin from Yellowfin Tuna Red Muscle by Ultrafiltration: Effect of pH and Ionic Strength
F. Sannier, C. LeCoeur, Q. Zhao, I. Garreau, and J.M. Piot

507 Polysaccharide Concentration and Molecular Weight Effects on the Oxygen Mass Transfer in a Reciprocating Plate Bioreactor
J. Audet, J. Thibault, and A. LeDuy

518 CHO DUKX Cell Lineages Preadapted to Growth in Serum-Free Suspension Culture Enable Rapid Development of Cell Culture Processes for the Manufacture of Recombinant Proteins
M.S. Sinacore, T.S. Charlebois, S. Harrison, S. Brennan, T. Richards, M. Hamilton, S. Scott, S. Brodeur, P. Oakes, M. Leonard, M. Switzer, A. Anagnostopoulos, B. Foster, A. Harris, M. Jankowski, M. Bond, S. Martin, and S.R. Adamson

529 Determinants of Liposome Partitioning in Aqueous Two-Phase Systems: Evaluation by Means of a Factorial Design
N. Moldavski and S. Cohen

December 5, 1996

539 Selective Extraction Using Preferential Transport Through Adsorptive Membranes
A. Agrawal and M.A. Burns

549 Kinetic, Dynamic, and Pathway Studies of Glycerol Metabolism by *Klebsiella pneumoniae* in Anaerobic Continuous Culture: I. The Phenomena and Characterization of Oscillation and Hysteresis
K. Menzel, A.-P. Zeng, H. Biebl, and W.-D. Deckwer

561 Kinetic, Dynamic, and Pathway Studies of Glycerol Metabolism by *Klebsiella pneumoniae* in Anaerobic Continuous Culture: II. Analysis of Metabolic Rates and Pathways under Oscillation and Steady-State Conditions
A.-P. Zeng, K. Menzel, and W.-D. Deckwer

572 Characterization of an Oxygen-Dependent Inducible Promoter System, the *nar* Promoter, and *Escherichia coli* with an Inactivated *nar* Operon
J. Lee, M.H. Cho, and J. Lee

579 Material Balance Studies on Animal Cell Metabolism Using a Stoichiometrically Based Reaction Network
L. Xie and D.I.C. Wang

591 Energy Metabolism and ATP Balance in Animal Cell Cultivation Using a Stoichiometrically Based Reaction Network
L. Xie and D.I.C. Wang

602 Modeling Substrate Inhibition of Microbial Growth
Y. Tan, Z.-X. Wang, and K.C. Marshall

609 Structural Basis for the Molecular Memory of Imprinted Proteins in Anhydrous Media
P. Mishra, K. Griebenow, and A.M. Klibanov

615 Regulation of Ribosome Synthesis in *Escherichia coli*: Effects of Temperature and Dilution Rate Changes
H.S. Yun, J. Hong, and H.C. Lim

Communication to the Editor

625 Fixation and Stabilization of *Escherichia coli* Cells Displaying Genetically Engineered Cell Surface Proteins
A. Freeman, S. Abramov, and G. Georgiou

631 Erratum

December 20, 1996

633 A Monte Carlo Simulation of Plasmid Replication During the Bacterial Division Cycle
H. Kuo and J. Keasling

648 Preparation of 3-Deacetyl Cephalosporins by *Aspergillus niger* Lipase
G. Carrea, A. Corcelli, G. Palmisano, and S. Riva

653 Control of L-Phenylalanine Production by Dual Feeding of Glucose and L-Tyrosine
M. Takagi, Y. Nishio, G. Oh, and T. Yoshida

661 A Fourier-Transform Infrared Spectroscopic Analysis of Organic Matter Degradation in a Bench-Scale Solid Substrate Fermentation (Composting) System
D.Y. Tseng, R. Vir, S.J. Traina, and J. Chalmers

672 Dependence of Mycelial Morphology on Impeller Type and Agitation Intensity
P. Jüsten, G.C. Paul, A.W. Nienow, and C.R. Thomas

685 A Metabolic Model for Biological Phosphorus Removal by Denitrifying Organisms
T. Kuba, E. Murnleitner, M.C.M. van Loosdrecht, and J.J. Heijnen

696 Rational Scale-Up of a Baculovirus-Insect Cell Batch Process Based on Medium Nutritional Depth
J.-D. Yang, P. Gecik, A. Collins, S. Czarnecki, H.-H. Hsu, A. Lasdun, R. Sundaram, G. Muthukumar, and M. Silberklang

Communications to the Editor

707 Regulatory Effects of Cellular Nicotinamide Nucleotides and Enzyme Activity on Poly(3-Hydroxybutyrate) Synthesis in Recombinant *Escherichia coli*
I.Y. Lee, M.K. Kim, Y.H. Park, and S.Y. Lee

713 Use of the Abiotic Proton Balance for Determining Linear Relations Among Net Conversion Rates of Primary Metabolites in Fermentation Processes
S.A. Siano

718 Demonstration of pH Control in a Commercial Immobolized Glucose Isomerase
R. Fournier, S. Varanasi, J.P. Byers, and G. Chen

723 In Appreciation

727 Indexes to Volume 52
